| Energy performance certificate (EPC) | | | |
|---|-------------------|---|--|
| Flat A, 76 Princess May Road London N16 8DG | Energy rating | Valid until: 2 March 2032 Certificate number: 0540-2878-0020-2522-8091 | |
| Property type | Ground-floor flat | | |
| Total floor area | 47 square metres | | |

Rules on letting this property

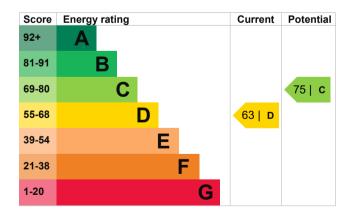

Properties can be rented if they have an energy rating from A to E.

If the property is rated F or G, it cannot be let, unless an exemption has been registered. You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be C.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

| Feature | Description | Rating |
|----------------------|--|-----------|
| Wall | Solid brick, as built, no insulation (assumed) | Poor |
| Window | Single glazed | Very poor |
| Main heating | Boiler and radiators, mains gas | Good |
| Main heating control | Programmer and room thermostat | Average |
| Hot water | From main system | Good |
| Lighting | Low energy lighting in all fixed outlets | Very good |
| Roof | (another dwelling above) | N/A |
| Floor | Suspended, no insulation (assumed) | N/A |
| Floor | Solid, no insulation (assumed) | N/A |
| Secondary heating | None | N/A |

Primary energy use

The primary energy use for this property per year is 290 kilowatt hours per square metre (kWh/m2).

| Environmental impact of this property | | This property produces | 2.4 tonnes of CO2 |
|--|-----------------|---|--|
| This property's current environmental impact rating is D. It has the potential to be C. | | This property's potential production | 1.4 tonnes of CO2 |
| Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce. | | By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 1.0 tonnes per year. This will help to protect the environment. | |
| Properties with an A rating p | roduce less CO2 | chwionment. | |
| than G rated properties. An average household produces | 6 tonnes of CO2 | Environmental impact rating assumptions about average energy use. They may not r | e occupancy and reflect how energy is |
| produces | | consumed by the people liv | |

How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from D (63) to C (75).

| Recommendation | Typical installation cost | Typical yearly saving |
|---|------------------------------|--------------------------|
| 1. Internal or external wall insulation | £4,000 - £14,000 | £98 |
| 2. Floor insulation (suspended floor) | £800 - £1,200 | £31 |
| 3. Replace single glazed windows with low-E double glazed windows | £3,300 - £6,500 | £34 |

Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

| Estimated energy use and potential savings | | Heating a property usually makes up the majority of energy costs. | |
|---|------|---|--|
| Estimated yearly energy cost for this property | £536 | Estimated energy used to heat this property Space heating 7582 kWh per year | |
| Potential saving | £164 | Water heating | 1493 kWh per year |
| The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property. | | Potential energy savings by installing insulation Type of insulation Amount of energy saved | |
| The estimated saving is based on makin the recommendations in <u>how to improve</u> property's energy performance. | • | Solid wall insulation You might be able to r | 2443 kWh per year receive <u>Renewable Heat</u> |
| For advice on how to reduce your energy bills visit <u>Simple Energy Advice</u> (<u>https://www.simpleenergyadvice.org.uk/</u>). | | Incentive payments (https://www.gov.uk/domestic- renewable-heat-incentive). This will help to reduce carbon emissions by replacing your existing heating system with one that generates renewable heat. The estimated energy required | |
| Heating use in this property | | | eating will form the basis |

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
